

PILOT - PERFORMANCE

PILOT-PERFORMANCE, FILTRI ARIA AD ALTE PRESTAZIONI

Progettati per garantire una portata d'aria maggiore rispetto ai tradizionali filtri in carta ed ottenere una migliore performance del motore. Lavabili e riutilizzabili più volte per una lunga durata e per un risparmio nei costi.

PILOT-PERFORMANCE, HIGH-FLOW AIR FILTERS

Designed to optimize air-flow volume and increase horsepower and acceleration. Washable, reusable for an extreme long life.

Filtri in carta - Standard filters

PERFORMANCE AIR FILTER + Kit Lavaggio Washing kit = 500.000 KM

PRE-OLIATI
pronti per l'installazione
PRE-OILED
ready for installation

MATERIALI

I materiali utilizzati per la produzione sono i migliori disponibili sul mercato.

POLIURETANO: leggero, flessibile ed inattaccabile da agenti chimici ed atmosferici.

COTONE: prodotto naturale, traspirante dalle caratteristiche ineguagliabili.

RETE IN ALLUMINIO: anodizzata e trattata con resina epossidica per garantire una efficace resistenza ai vapori del carburante e alla ossidazione dovuta all'umidità dell'aria e alla presenza di polveri di sodio cloruro (sale, comunemente usato in inverno per prevenire la formazione di ghiaccio sulla strada).

TECNOLOGIA "IN-MOULD"

I filtri Pilot-Performance sono prodotti utilizzando una speciale resina in poliuretano, leggera, morbida e flessibile, stampata ed iniettata a caldo. Con questo unico procedimento denominato "IN-MOULD" la superficie filtrante viene "sigillata" all'interno della cornice in poliuretano e tutto il filtro diventa un corpo unico, senza incollaggi, saldature o fessure che potrebbero comprometterne la durata e la performance.

QUALI SONO I VANTAGGI DEI FILTRI IN COTONE PILOT-PERFORMANCE?

- I filtri in cotone utilizzano la stessa tecnologia e gli stessi materiali dei filtri comunemente installati sulle vetture da competizione, formula uno, rally e velocità turismo.
- Questi filtri consentono di limitare al minimo la perdita di pressione del flusso d'aria che attraversa il filtro stesso ed entra nella camera di combustione.
- Più aria entra nel motore, maggiore è l'efficienza della combustione e di conseguenza, anche la potenza e l'accelerazione beneficiano di questo miglioramento.

PERFORMANTE - ECOLOGICO - CONVENIENTE

- A differenza dei filtri in carta, il filtro Pilot-Performance, non necessita di sostituzione e può essere utilizzato per tutta la vita del veicolo.
- Ad intervalli di 20-25.000 Km, il filtro può essere lavato e rigenerato, utilizzando l'apposito KIT di lavaggio (il kit è composto da detergente e olio rigenerante).
- Le migliaia di microscopici filamenti in cotone assorbono l'olio appositamente formulato, trattengono tutte le impurità dell'aria, proteggono il motore ed assicurano sempre il flusso ottimale di aria.

MATERIALS

Manufactured using the best raw materials.

POLYURETHANE: light, flexible, anti-ageing and chemical-proof.

COTTON: unbeatable natural fibre, well-known for its breathing property.

ALUMINIUM MESH: anodized and epoxy coated to guarantee a long lasting resistance to fuel vapours as well to oxidation caused by air humidity and the presence of sodium chloride (known as salt, commonly used in winter to prevent ice on roads).

"IN-MOULD" TECHNOLOGY

All Pilot-Performance filters are manufactured using a special soft and light

polyurethane resin which is hot-injected into the mould. With this unique manufacturing process called "IN-MOULD", the filtering unit is being "moulded" into the injected resin frame forming a single-body product.

The result of this process is a "state of the art" filter, without any gluing, welding or slots which could compromise the performance and the durability.

WHAT ARE THE ADVANTAGES OF USING PILOT-PERFORMANCE COTTON FILTERS?

- Our filters use same technology and materials as used on the competition vehicles such as formula one, rally and touring race cars.
- These filters reduce the air restrictions, allow more air through the filter, let the engine breath more and perform at its best.
- More air reaches the engine, better is the combustion and consequently more horsepower and acceleration are performed.

HIGHLY PERFORMANT - ENVIRONMENTAL FRIENDLY - CONVENIENT

- One Pilot-Performance filter will last the life of your vehicle. No more air filter replacements are necessary.
- At regular intervals of 20-25.000 Km, the filter can be washed and regenerated by using the specially formulated WASHING KIT (consisting of detergent and regenerating oil).
- Thousands of microscopic cotton threads absorb the specially formulated oil to create a powerful and efficient filtering media that protects motor from harmful contaminants.

FLOW CAPACITY - FILTER MATERIAL TEST

La tabella comparativa si riferisce a filtri nuovi, testati in laboratorio. I dati possono variare in base al modello di filtro ed al veicolo.

This chart is an example of individual filter tested using laboratory equipment in dust-free conditions. Data may vary depending on filter model and vehicle.
